Mixed Waste/MBT Facility	Yes
<p style="text-align: center;">Description of Composting Facility</p> <p>NWP produce high quality compost from garden clippings collected from local authorities throughout Northern Ireland. The compost produced is called Rosey Lee Organic Compost and is currently stocked in over forty garden centre's throughout Ireland. NWP is the first company in Ireland to receive the highly coveted seal of approval for Rosey Lee Organic Compost - BSI PAS 100 certified from the UK Composting Association. NWP has surpassed compost producers throughout the UK to pick up a prestigious award for excellence in marketing for their compost product Rosey Lee Organic Compost from the UK Composting Association.</p> <p>With the completion of a 1.75 million pound refurbishment to NWP's Keady, NWP's recycling service will include category three animal by-products. It is expected that when the installation of new technology is completed NWP will be the first fully compliant composting animal by-product facility in Northern Ireland. In many ways, the move towards using animal by-products for compost is the natural extension of NWP's work to enable councils to facilitate households and catering facilities to dispose of organic kitchen waste more effectively.</p>
