

Kilberry Composting Facility

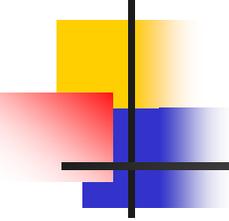

Kilberry Composting Facility

- It's unique-customer driven
- The multiples demand that peat should be diluted at an increasing level initially at 5% now (2006) at 15%-20% dilution
- Raw material needs to be top class (non hazardous and low contamination)
- Final product is used as a component of a growing media.

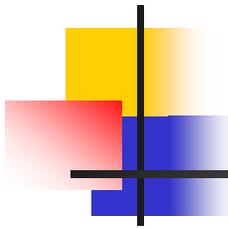

Some Facts and Figures

- Opened Summer 2005
- EPA Waste License 198-1
- Area 4.2ha
- Asphalt surface
- Leachate collection and recirculation system
- Total cost €4.5m (Civil & Mechanical)

Feedstock

- The facility composts these materials for peat dilution
- Greenwaste (Dublin Region)
- Timber/Woodwaste
- Food/Beverage by-products
- Plus others if appropriate and by agreement.

Technology

- Windrow composting
- Target 12 week cycle
- Frequent turning initially
- Moisture and temperature management
- N addition at beginning
- Range of tests to ensure stability
- Incorporation into horticultural products on site
